PROFESSIONAL EXPERIENCE

Quality Engineer Summer Intern, Ligentia Ltd. (July 2025 - September 2025)

- Wrote 16 new end-to-end automated tests using **Playwright**, **NUnit**, and **C#** for the company's logistics-based web applications
- Implemented repository-wide refactoring changes that spanned hundreds of files
- Facilitated the research and integration of **MCP** in the quality team processes
- Worked with **Azure DevOps**, running **CI/CD pipelines** to automate builds and tests, including updating project packages to maintain consistent and reliable releases.
- Worked in a **Scrum** environment (**standups**, **sprint planning**, **retrospectives**)

Industrial Placement .NET Developer, Cantarus Ltd. (July 2024 - June 2025)

- Worked in the client success team to handle incoming tickets and long-term projects
- Maintained and developed over 15 different content management system websites (**Umbraco**, **DotNetNuke**, **Kentico**) built on the **C# .NET** platform
- Regularly worked with clients to schedule production releases and refine project requirements
- Performed and tested time-sensitive feature deployments on the test and live environments
- Actively managed multiple projects and tickets simultaneously, working in an **AGILE** environment
- Received a 100% client satisfaction rate with more than 50 helpdesk tickets resolved and 5 long-term projects delivered within the target deadline
- Used **MS SQL** to investigate bugs, **GitLab CI/CD** to manage development and deployment flow
- Worked with **JavaScript**, **CSS (Sass and Tailwind)**, **ASP.NET**, **Web API/Restful Services**
- Notable projects: collaborated with a senior developer to deliver a time-sensitive site-wide rebrand, redesigned a site search component, and rebuilt a homepage for a site

EDUCATION

University of Leeds (2022 - 2027) - predicted first class

MEng, BSc Computer Science (Industrial)

- First Year - **85% average**, Second Year: **70% average**
 - Modules: Object Oriented Programming, Computer Processors, Discrete Mathematics, Artificial Intelligence, Calculus and Math Analysis, Algorithms & Data Structures, Machine Learning
-

British School Jakarta (2018 - 2022)

- IB program (**41/45 total score**) - Top 10% scorer of 10,000 exam candidates worldwide
- Pearson Excellence Award, 2x Bronze UKMT Senior Maths Award

PROJECTS - jasons321.github.io/personal-portfolio

Care-home sensor dashboard | React, Material UI, AWS

- Real-time movement activity tracker/dashboard web application developed as a team
- Worked on front-end design and rendering of sensor data, managed using JIRA

Reading journal app | Java, Swing, Google API, MySQL

- Desktop GUI application that allows users to write journaling thoughts on reading materials
- Conducted **requirements analysis**, developed a **UML + ER** diagram, and designed using **Figma**

Image compression algorithms | C

- Implemented an image compression algorithm using pixel values on a binary level
- Key concepts: **pointers, arrays, dynamic memory allocation, file I/O, bitwise operations**

EXTRACURRICULAR

Leeds University Union Hiking Society (2025 - Present)

International Secretary, Weekend Hike Leader

- Providing support on hiking-related matters for international student members
- Organise and lead hiking groups on Sundays, including route planning and weather forecasting
- Manage groups of varying sizes and abilities, ensuring the safety of members on hikes

Leeds University Union Chess Society (2024 - 2025)

Treasurer

- Monitored and managed finances for the society
- Budget estimation, monitored cash flow, and produced financial documents
