EXPERIENCE

Cantarus, Industrial Placement Developer | 2024 - Current

- Part of the client success team, delivering client web development needs
- Works with C#, .Net, JavaScript, HTML, CSS, Umbraco and DNN CMS, Microsoft SQL, Git
- Regularly communicate with clients to deliver website changes and projects
- Manage deployments to live and test websites, often multitasking to manage project deadlines
- Works collaboratively as a team to coordinate projects and share ideas

Leeds University Union Chess Society, Treasurer | 2024 - Current

- Organise and manage finances for the university chess society
- Budget estimation, cash flow monitoring, producing financial documents
- Works with other members of the committee to coordinate expenses and budget
- Increased society income for the current semester by 10% through events

ACADEMIC/PERSONAL PROJECTS

Care-home sensor activity web application

- Building a real-time room and movement activity tracker using the React framework
- Hosted on AWS, the web application interacts with sensor hardware to display real-time data to ensure occupant safety in care homes
- Currently working on JavaScript to Typescript migration

Transaction and Inventory management web application

- Full-stack web application (JavaScript, CSS, HTML, SQL), **nodeJS** framework as backend
- Features include: sorting and filtering product catalogues, updating inventories from the database after transaction, generating receipts and sending them to customers through email after converting them to PDF, basket system, authentication and authorisation system

Image compression and decompression algorithms using C

- Involves compressing standard 8-bit pixel values in C into 7-bit and 5-bit
- Reading and writing binary values from text files
- Working with dynamic and multi-dimensional arrays

EXTRACURRICULAR / CERTIFICATION

Courses

November 2023 | **J.P. Morgan Software Engineering Virtual Experience** - Set up a local dev environment by downloading the necessary files, tools and dependencies. Used JPMorgan Chase's open-source library called Perspective to generate a live graph that displays a data feed in a clear and visually appealing way for traders to monitor

August 2021 | **inspiritAI course** – a 2-week course on implementing machine learning algorithms using Python. Gave a presentation with my team on our findings on the various techniques (keyword extraction, bag of words, tokenisation) used in natural language processing.

August 2019 | **IONIC app development** – learned to use the ionic framework to develop mobile apps. Created a restaurant booking app for managing and creating bookings.

ACHIEVEMENTS

- Pearson Excellence Award for achieving A/A* in all Pearson subjects
- UKMT Senior Maths Challenge (2x Bronze award)
- Raised £500 for a charity by selling tote bags and raising awareness for plastic pollution
- World Scholar's Cup: awarded the top 50 debaters title within the city of Jakarta, reached the tournament of champions round.

VOLUNTEERING

Framer Website Designer, SmartNakuru | 2024 - Current
